CIA/NICARAGUA/
FREEDOM MANUAL

KOPPEL: Another purported CIA operation designed to make life difficult for Nicaragua's Sandinista regime has come to light. A comic book-style manual written in Spanish urges Nicaraguans to call in sick to work, to pour sand into engines and engage in various acts of sabotage. It also includes instructions on how to build a Molotov cocktail. The manual allegedly was produced by the CIA for Nicaraguan rebels. The CIA has refused comment.
